

gravity sketch

You can use these QR codes as anchors for Spatial Alignment in the Gravity Sketch app on Meta Quest.

To create a new Spatial Alignment

1. Place one QR code in your physical space, either printed or onscreen. 100% scale is recommended.
2. Open Gravity Sketch on your Meta Quest, then open a Room and enable passthrough.
3. Look at the QR code to detect it, then hover with your controller and click the button to create a new Alignment.

To use an existing Spatial Alignment

1. Open Gravity Sketch on your Meta Quest, then open a Room and enable passthrough.
2. Find a QR code associated with an existing Alignment.
3. Look at the QR code to detect it, then hover with your controller and click the button to align to your physical space.

Notes

- To keep an alignment consistent, QR codes must remain in the same position in your physical space.
- Spatial Alignment with QR codes is currently supported on Meta Quest 3 and 3S only.
